Steam profiles were public by default, but Valve made them private by default. Still, you may have made it public to work with a third-party service like IsThereAnyDeal, which reads the information on your steam profile, scans your wish list for the game, and lets you know if they're on sale in other game stores. To access your profile on Steam, click on your username at the top and click profile. To fix your profile, click the Fix Profile button on the right side of the page. Click my Privacy Settings on the right side of your page to find Steam's profile privacy options. Set the privacy settings here to control what people can see. You have two options to hide the game. Set gameplay details to Custom to hide gameplay information. Even your friends can't see the games you play, the games you have, or the games you list. They can still see your friends list, inventory, comments, and other information, depending on the options you choose on this page. You can also hide everything by setting my Profile to Private. If you do this, if no one can see your entire profile page. You can also choose Friends Only, and only steam friends can see your profile. Hide Play Activity from Steam Chat

If you're just embarrassed by the game you're playing right now — maybe you don't care if it's listed on your profile page, but you don't want all your friends to report that you've started playing or started playing—you can go offline or be invisible in Steam chat. To do this, click Steaming Friends and Chat, click your username, and select Offline or Invisible. While this information still appears on your profile page, your friends can't see what you're playing right now. Keep in mind that steam chat will prevent your friends from seeing the games you're playing, even if you're online. Hide or Remove Games from Your Steam Library If you want to hide a game from the Steam library on your computer, you can set the game to Hidden or remove it from your Steam library. People who have access to the game details on your profile will still be able to see the achievements and game durations you have achieved in this game. However, not everyone who has access to your computer will see the game in your regular Steam library.
